# V VALERE

ACCELERATE ARTIFICIAL INTELLIGENCE (AI) FROM IDEA TO IMPACT.

AI TRANSFORMATION

Valere's team of certified AI experts partner with organizations to transform business & build solutions that solve complex business challenges, automate processes, optimize results, predict outcomes, & reshape business models. Gain a competitive edge in your industry & unlock value within your organization by applying Valere's state-of-the-art machine learning techniques to your data.

HOW WE PARTNER

- AI Strategy & Design
- AI Systems Engineering
- AI & ML Operations
- Data Science & Advanced Analytics

- Generative AI (GenAI)
- GenAI Organizational Knowledge Base
- Large Language Models (LLM)
- Machine Learning (ML) & Deep Learning

"We have been collaborating with Valere for over a year. Their team is professional and possesses the depth of technical expertise that is required. What truly sets them apart is their commitment to consistent delivery and outstanding results. Pair that with an engaging and enjoyable partnership experience and you have the whole package."

CLAYTON DAVIS
DIRECTOR | CAYLENT
AWS INNOVATION PARTNER
OF THE YEAR

HOW WE DIFFER

- Team of 200+ in-house experts located in six strategic near-shore & off-shore offices around the globe.
- Unique composition of U.S. oversight integrated with global development offices allows for cost-efficiency & consistent quality standards.
- AI/ML experience spanning a decade in organizations such as Apple, Uber, MIT, American Express, & Booz Allen Hamilton.
- Expertise in building over 300+ custom AI-enabled Solutions & Digital Products.
- Priority on quality & efficiency achieved through continuous process optimization, a unified culture, & rigorous hiring standards.
- Recipient of over 30+ awards & accolades (2021, 2022, 2023, 2024).

ENGAGEMENT SPOTLIGHT

aws PARTNER Generative AI Competency

aws

AWS GenAI Internal Knowledge Catalysts

Partnering with Amazon & AWS Partner of the Year, Caylent, Valere designed & developed over 10 custom Generative AI platforms for AWS, leveraging Retrieval - Augmented Generation (RAG) techniques, internal datasets, & Bedrock supported LLM to help organizations accelerate the launch & implementation of new technologies that deliver tangible value.
